

SENT-GEO module activation

1. Open “Account settings”. In “System configuration” tab enable “SENT-GEO integration” and press “Save”:

SENT-GEO module activation

2. Open “SENT-GEO” module and select a needed object. In the new tab press a left mouse button to copy the Ruptela ID, which is necessary to register an object in Polish SENT-GEO system:

The screenshot displays the SENT-GEO module interface. On the left, a sidebar contains various navigation icons, with the bottom-most icon (a blue square with a white cross) highlighted by a red box and a red arrow pointing to the main content area. The main content area is divided into two panels. The left panel, titled "Sent Geo", shows a list of vehicles under the heading "All vehicles" (6 total). Each vehicle entry includes a circular icon (green or red), a redacted name, and a status of "Off". A red arrow points from the bottom-most vehicle entry to the right panel. The right panel, titled "BY, E28", displays the location "54.2431759, 26.3326216" and the Ruptela ID "17e3bcc2 [redacted] 6a..". A red arrow points from the Ruptela ID to a red text instruction: "Press left mouse button to copy Ruptela ID". Below this, the "Sent-Geo ID" field is visible, and the "Send data" toggle is set to "Off".

SENT-GEO module activation

3. Open <https://puesc.gov.pl> and log-in with your company credentials. Go to Forms > Formularze SENT > SENT-GEO - ZSL SERVICES AND GPS DEVICES and fill SENT470 form:

Specyfikacja techniczna komunikatów SENT 2 v.20190226
• Specyfikacja techniczna komunikatów SENT 2 v.20190226.zip

Technical identifier of the GPS device	Number of the GPS device	Status of the GPS device	Additional Information	Creation date:	User registering:	Modification date:	User modifying the notification:
	Z00-AZ -3	zarejestrowany					

Contact details to the administrator of the carrier that registers a GPS device

Phone number: E-mail address:

Comments:

Test object to check if parameters are correctly formed in our side and pushed to SENT.

Copy this ID

SENT-GEO module activation

5. Go back to SENT-GEO module on TrustTrack, open the needed object and press on “Sent-Geo ID” field:

The screenshot displays the TrustTrack interface for the SENT-GEO module. At the top, there is a search bar labeled "Search for vehicles and locations". Below this, the interface is split into two main sections. The left section, titled "Sent Geo", shows a list of vehicles under the heading "All vehicles" (6 total). A search bar and a "Filter objects" dropdown (set to "All") are present. The list contains four entries, each with a circular icon (red or green) and a status of "Off". The right section shows a detailed view of a selected object, identified as "BY, E28" with coordinates "54.2431759, 26.3326216". This view includes fields for "Ruptela ID" (17e3b...a...), "Sent-Geo ID" (highlighted with a red box and containing a hyphen), and a "Send data" toggle switch currently set to "Off".

SENT-GEO module activation

6. Paste the copied "Number of the GPS device" from SENT471 form and press the confirmation mark:

The screenshot displays the SENT-GEO module activation interface. At the top, there is a search bar labeled "Search for vehicles and locations". Below it, the "Sent Geo" module is active, showing a list of vehicles under the heading "All vehicles" (6 vehicles). The list includes icons for different vehicle types and their status (Off). A modal window is open, showing a "Sent-Geo ID" field. The input field contains "Z00[redacted]3". A red box highlights the input field, and a red arrow points from the input field to a confirmation button (checkmark) in the modal. Below the modal, a red text label reads "Paste copied 'Number of the GPS device'" with a red arrow pointing to the input field.

SENT-GEO module activation

7. Object is now ready to push data to Polish regulation system SENT-GEO. As soon as the object has to send data, enable sending by turning the button On. When excise cargo is unloaded, disable data sending by turning it Off:
